Seminar Outline DAY 3

DAY 3

- Hull Prototype measurement
- Hull Construction Controlsies
- Rating systems
- Standard Class Rules
- PFDs
- Seminar Review
- Preparation for the IM test
- International Measurers Examination with written Test

RIG Measurement
Boom and Mast

470 Hull is too big to fit into the classroom,
so we measured it outdoors.

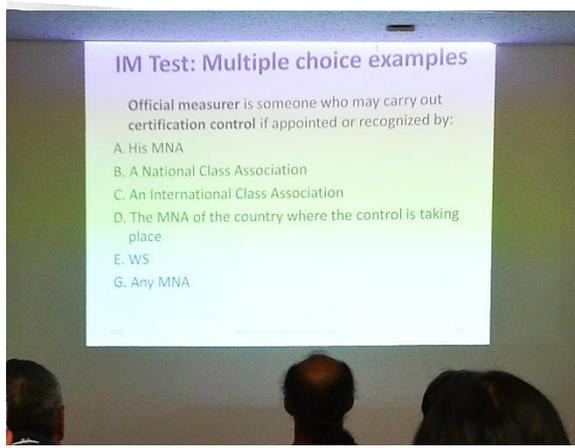

Everyone ate the souvenir sweets, so there wasn't much left.

Instructions

- The test includes 40 multiple choice questions.
- You have 1 hour to complete the examination (1.5 hours if English is not your first language).
- Mark your answers by putting a circle around the relevant letters. For some questions there may be more than one correct answer. Points will be deducted for any wrong answers marked in addition to the correct ones.
- If you change an answer place an X over the mistakenly circled letter.
- In those questions that require you to mark a point or dimension on a diagram, please do so in a clear way, showing all needed reference lines and marking the required points with a dot and an arrow.
- Terms printed in "bold" type refer to their definition as given in the EIS. Therefore, answers should be given based on that definition only.
- Questions 31 to 40 score double points compared to questions 1 to 30.

IM Test: Multiple choice examples

Official measurer is someone who may carry out certification control if appointed or recognized by:

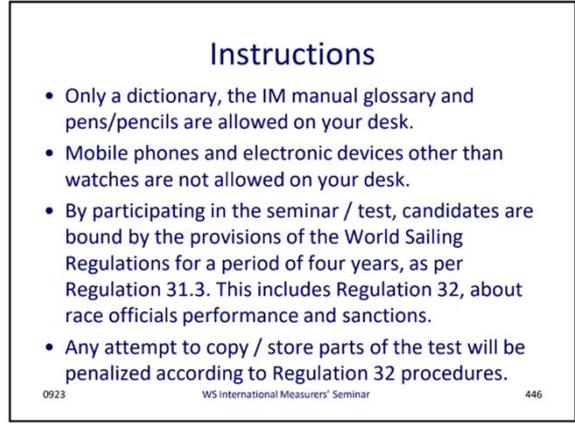

- A. His MNA
- B. A National Class Association
- C. An International Class Association
- D. The MNA of the country where the control is taking place
- E. WS
- G. Any MNA
